

Summer Reading Study Guide – AP Biology

Statement of Intent: Summer reading for AP Biology is very important. It allows us to begin the class earlier which takes a certain amount of pressure off the school year.

Instructions: You will need to read chapters 46, 47 and Chapter 50 through Chapter 55 in *Biology, 7th Edition* (your current Pre-AP Bio text). Take notes (does not need to be an outline) as you read the important points. Review all chapters beyond 40 from Pre-AP Biology.

Suggestion: Since you are taking notes on chapters, you could spread the reading out over summer vacation. Then, in late August, review your notes. Just an idea...you should know what works best for you!

Any questions? See Ms. Yang or e-mail at yangj@ihssac.org.
